

SMARTTECH

X-ray Color Key

Blue-equals hard materials. Metal (blue/black), hard plastics, alloys etc. For example, your gun or your metal knife will show up as blue or black or a mix, as will wires, batteries, etc.

Orange-is organic material. Anything that is natural and some things that aren't. Rubber, leather, food, dynamite and most explosives (Black powder and black powder substitutes will display as green), all liquids and gels and organic powders (flour).

Green-is for plastics and alloys, where the density isn't great enough to make it blue or black. This can also be ceramics, though only the densest of them.
